Preface	
Before You Begin	
Chapter 1. Introduction to Computers, the Internet and the Web	28
Section 1.1. Introduction	
Section 1.2. What Is a Computer?	31
Section 1.3. Computer Organization	
Section 1.4. Early Operating Systems	32
Section 1.5. Personal, Distributed and Client/Server Computing	33
Section 1.6. The Internet and the World Wide Web	33
Section 1.7. Machine Languages, Assembly Languages and High-Level Languages	
Section 1.8. History of C and C++	
Section 1.9. History of Java	
Section 1.10. Java Class Libraries. Section 1.11. Fortran, COBOL, Pascal and Ada	
Section 1.12. BASIC, Visual Basic, Visual C++, C# and .NET	37
Section 1.13. Typical Java Development Environment.	
Section 1.14. Notes about Java and Java How to Program, 7/e	
Section 1.15. Test-Driving a Java Application.	
Section 1.16. Software Engineering Case Study: Introduction to Object Technology and the UML	
Section 1.17. Web 2.0.	
Section 1.18. Software Technologies	
Section 1.19. Wrap-Up	
Section 1.20. Web Resources	
Summary

Exercises	
Chapter 2. Introduction to Java Applications	64
Section 2.1. Introduction.	65
Section 2.2. A First Program in Java: Printing a Line of Text	
Section 2.3. Modifying Our First Java Program	72
Section 2.4 Displaying Text with printf	75
Section 2.5. Another Java Application: Adding Integers	
Section 2.6. Memory Concepts	
Section 2.7. Arithmetic	
Section 2.8. Decision Making: Equality and Relational Operators	85
Section 2.9. (Optional) Software Engineering Case Study: Examining the Requirements Document	
Section 2.10. Wrap-Up Summary	
Terminology	
Self-Review Exercises	_
Answers to Self-Review Exercises.	
Exercises.	
Chapter 3. Introduction to Classes and Objects	
Section 3.1. Introduction	
Section 3.2. Classes, Objects, Methods and Instance variables	
Section 3.4. Declaring a Method with a Parameter	
Section 3.5. Instance Variables, set Methods and get Methods	
Section 3.6. Primitive Types vs. Reference Types	
Section 3.7. Initializing Objects with Constructors	
Section 3.8. Floating-Point Numbers and Type double	

Section 3.9. (Optional) GUI and Graphics Case Study: Using Dialog Boxes	135
Section 3.10. (Optional) Software Engineering Case Study: Identifying the Classes in a Requirements Document	
Section 3.11. Wrap-Up	146
Summary	146
Terminology	149
Self-Review Exercises.	150
Answers to Self-Review Exercises	151
Exercises	
Chapter 4. Control Statements: Part 1	154
Section 4.1. Introduction	
Section 4.2 Algorithms	155
Section 4.3. Pseudocode	
Section 4.4. Control Structures	
Section 4.5. if Single-Selection Statement	150
Section 4.6. ifelse Double-Selection Statement	
Section 4.7. while Repetition Statement	
Section 4.8. Formulating Algorithms: Counter-Controlled Repetition	105
Section 4.9. Formulating Algorithms: Sentinel-Controlled Repetition	
Section 4.10. Formulating Algorithms: Sentiner-Controlled Repetition	
Section 4.11. Compound Assignment Operators	
Section 4.12. Increment and Decrement Operators.	
Section 4.13. Primitive Types.	
Section 4.14. (Optional) GUI and Graphics Case Study: Creating Simple Drawings	
Section 4.15. (Optional) Software Engineering Case Study: Identifying Class Attributes	
Section 4.16. Wrap-Up
